

The Dr. Schär Group is specialized in the field of products for specific nutritional needs. Our R&D Centre, located at AREA Science Park in Trieste (Italy), offers the opportunity to carry out within the Research&Innovation department - Application Research team:

## An internship in the field of packaging (m/f)

Main activities:

- Research and study of new and innovative technologies for packaging;
- Collaboration with the technical department and with the Product Development department in the implementation of new plants and plant improvements (industrial tests at our plants or at plant manufacturers);
- Support in evaluation projects of new packaging materials;
- Support in packaging problem solving and new product development;
- Collaboration in the drafting of new analysis methods;
- Archiving results of analysis and activities during research projects (graphs, data, etc.);
- Conducting product durability testing.

Profile:

- Recent graduate (m/f) in agri-food/ packaging/ materials/ chemical engineering;
- Fluent knowledge of Italian and English language;
- Ability to work in a team, proactive approach and a great desire to learn!

What we offer:

- 6-month extracurricular internship with placement opportunities;
- International and familiar working environment;
- Different and challenging tasks and projects.
